

INDEX TO 1969 ARTICLES

An issue-by-issue article index for the convenience of those who may not have received all issues during 1969. Back copies, when available, may be secured at a cost of \$1.50 each. Microfilm volumes of out-of-print issues and articles are available from University Microfilms Library Services Division, Xerox Corporation, Ann Arbor, Michigan 48106. Please query Xerox for price structure.

Vol. 4 No. 1 January

1969 Data Book & Buyers Guide	
Low temperature insulation—Part I	
by Peter E. Glasser	123

Vol. 4 No. 2 February

Brookhaven National Laboratory builds strongest large magnet	
by Gerald Van Tillburg	14
Low temperature insulations—Powders and Fibers—Part II	
by Peter Glaser	18
New process uses O ₂ in water pollution control	22
Process helium purification system	
by Donald Harrison	24

Vol. 4 No. 3 March

Largest expander cycle LNG plant now in operation	
by Irving Weiss and Stephen J. Markbreiter	24
MHD—Magnetohydrodynamic power generation	
by Stanley W. Petty	28
Nitrogen-cooled cables for underground transmission	19
Total energy transfer systems for LNG and electrical power	
by Alexis Pastuhov and Frank Ruccia	14
World's largest superconducting magnet for MHD	38

Vol. 4 No. 4 April

Cryogenic life support system for Apollo	
by Alton E. O'Banion	14
LNG fuel/freeze systems in transport vehicles	
by J. T. Bernstein	10
Leak testing of cryogenic vessels—Part I	
by Robert J. Roehrs	26
Low temperature insulations—multilayer systems—Part III	
by Peter E. Glaser	16

Vol. 4 No. 5 May

Leak testing of cryogenic vessels—Part II	
by Robert J. Roehrs	26
Low temperature insulations—foams and composites—Part IV	
by Peter E. Glaser	20
Operating characteristics of biological storage vessels maintained with liquid nitrogen	
by P. J. Gareis, C. W. Cowley, and H. R. Gallisdorfer	16

Vol. 4 No. 6 June

ANL now operating king-sized superconducting magnet	
by John R. Purcell	64
Cryogenic applications in the nuclear rocket program	
by F. J. Edeskuty, J. B. Henshall and J. R. Bartlit	36
Cryogenic design launches new competitor in CO ₂ market	
by Emil Cimler and Guy M. Barbolini	54
Deflashing molded rubber parts with liquid nitrogen	
by Robert S. Adams	60
Storage and distribution of cryogenic liquids	
by A. A. Holcombe	67
Thank you, Cecil Lightfoot	33
Vibrating heat engine	
by H. J. Smith	72

Vol. 4 No. 7 July

Design and startup of LNG facilities	
by P. C. Johnson	25
Operating characteristics of today's large capacity ethylene plant	13
Superconductive underground electric transmission: One step closer	22
Urethane foam is flexible	
by Harry H. Bahrenburg, PE	29

Vol. 4 No. 8 August

Analytical instruments for precise product purity	
by B. M. Anderson and E. J. Cooney	24
Capacitance level gaging for pre-launch loading of slush hydrogen	
by R. M. Kocher and A. E. Brown	28
Control center design: Man-machine interface	15
Cryogenic flowmeters—today	
by D. L. Close	19

Vol. 4 No. 9 September

Ground refueling systems for liquid methane fueled supersonic aircraft	26
Proposed standards for cryogenic equipment	
by B. A. Bernstein	24
Selection of stainless steels for cryogenic service	
by K. G. Brickner	30
Seven methods of in-transit food refrigeration	34
Western Electric gets economical, high-purity nitrogen from new plant	19

Vol. 4 No. 10 October

Helium refrigeration system for 100 GeV superconducting accelerator	
by G. Ratliff	29
Magnetically suspended trains: The application of superconductors to high-speed transport	
by James R. Powell and Gordon R. Danby	19
Thermodynamic properties of LNG—Part I	
by R. L. Kao, T. K. Subramaniam, M. H. Gonzales and A. L. Lee	35

AUTHOR'S INDEX

A

- Adams, Robert S.
Deflashing molded rubber parts with liquid
nitrogen (June) 60
- Anderson, B. M. & Cooney, E. J.
Analytical instruments for precise product
purity (Aug.) 24

B

- Bahrenburg, Harry H.
Urethane foam is flexible (July) 29
- Barbolini, G. M. & Cimler, Emil
Cryogenic design launches new competitor in CO₂
market (June) 54
- Bartlit, J. R., Edeskuty, F. J. & Henshall, J. B.
Cryogenic applications in the nuclear rocket
program (June) 36
- Bernstein, B. A.
Proposed standards for cryogenic
equipment (Sept.) 24
- Bernstein, J. T.
LNG fuel/freeze systems in transport
vehicles (Apr.) 10
- Brickner, K. G.
Selection of stainless steels for cryogenic
service (Sept.) 30
- Brown, A. E. & Kocher, R. M.
Capacitance level gaging for pre-launch loading of
slush hydrogen (Aug.) 28

C

- Cimler, Emil & Barbolini, Guy M.
Cryogenic design launches new competitor in CO₂
market (June) 54
- Close, D. L.
Cryogenic flowmeters—today (Aug.) 19
- Cooney, E. J. & Anderson, B. M.
Analytical instruments for precise product
purity (Aug.) 24
- Cowley, C. W., Gareis, P. J., & Gallisdorfer, H. R.
Operating characteristics of biological storage vessels
maintained with liquid nitrogen (May) 16

D

- Danby, Gordon R. & Powell, James R.
Magnetically suspended trains: The application of
superconductors to high-speed transport ... (Oct.) 19

E

- Edeskuty, F. J., Henshall, J. B. & Bartlit, J. R.
Cryogenic applications in the nuclear rocket
program (June) 36

G

- Gallisdorfer, H. R., Gareis, P. J., & Cowley, C. W.
Operating characteristics of biological storage vessels
maintained with liquid nitrogen (May) 16
- Gareis, P. J., Cowley, C. W., & Gallisdorfer, H. R.
Operating characteristics of biological storage vessels
maintained with liquid nitrogen (May) 16
- Glaser, Peter E.
Low temperature insulations—Part I (Jan) 123
- Low temperature insulations—Powders and
Fibers—Part II (Feb.) 18
- Low temperature insulations—Multilayer
systems—Part III (Apr.) 16
- Low temperature insulations—Foams and
Composites—Part IV (May) 20
- Gonzales, M. H., Kao, R. L., Subramaniam, T. K.,
& Lee, A. L.
Thermodynamic properties of LNG—Part I (Oct.) 35
- Thermodynamic properties of LNG—Part II ... (Nov.) 26
- Thermodynamic properties of LNG—Part III .. (Dec.) 20

H

- Harrison, Donald
Process helium purification system (Feb.) 24
- Henshall, J. B., Edeskuty, F. J., & Bartlit, J. R.
Cryogenic applications in the nuclear rocket
program (June) 36
- Holcome, A. H.
Storage and distribution of cryogenic
liquids (June) 67

J

- Johnson, P. C.
Design and startup of LNG facilities (July) 25

K

- Kao, R. L., Subramaniam, T. K. Gonzales, M. H.,
& Lee, A. L.
Thermodynamic properties of LNG—Part I (Oct.) 35
- Thermodynamic properties of LNG—Part II ... (Nov.) 26
- Thermodynamic properties of LNG—Part III .. (Dec.) 20
- Kocher, R. M. & Brown, A. E.
Capacitance level gaging for pre-launch loading of
slush hydrogen (Aug.) 28

L

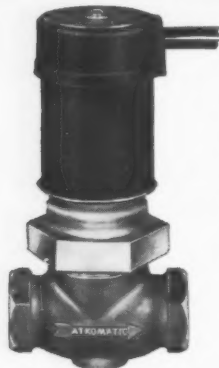

- Latham, W. N.
Optimum LNG highway tanker (Dec.) 13
- Lee, A. L., Kao, R. L., Subramaniam, T. K., &
Gonzales, M. H.
Thermodynamic properties of LNG
—Part I (Oct.) 35
- Thermodynamic properties of LNG
—Part II (Nov.) 26
- Thermodynamic properties of LNG
—Part III (Dec.) 20

IDEAL for CRYOGENIC SERVICE

Vacuum to 10,000 psi • -420°F to +500°F

ATKOMATIC SOLENOID VALVES

CUSTOM-BUILT from stock parts to fit your actual pressure range, medium, and voltage requirements.

Types: Direct—Semi direct—Pilot piston
Configurations: Globe or right angle
Materials: Bronze or stainless steel
Pressures: Vacuum to 10,000 psi
Temperatures: -420°F. to +500°F. (Cryogenics to superheated steam)
Pipe Sizes: 1/2" through 3" (special threads available)
Voltages: 6 to 275 DC and 6 to 550 AC, 50 or 60 cycle
Options: Many available—just ask!
Housings: Standard, waterproof, explosion proof
Coils: Class A, epoxy molded, Class H high temperature
Shipment: Normally 1 week or less (all parts stocked). Special valves—consult factory

Every valve individually built, tested, and guaranteed to operate as specified.

KÄLTETECHNIK KLIMATISIERUNG

KÄLTETECHNIK-
KLIMATISIERUNG
20
JAHRE

Zeitschrift für das gesamte Gebiet der Kälteerzeugung, Kälteanwendung und Klimatisierung.

Organ des Deutschen Kältetechnischen Vereins, des Fachverbandes der Kühlhäuser und Eisfabriken e.V., Mitteilungsblatt der Fachgemeinschaft Kälteindustrie im VDMA. Herausgeber Prof. Dr.-Ing. Drs. h. c. R. Plank, Universität Karlsruhe (TH).

Die Kältetechnik-Klimatisierung hat sich seit über 20 Jahren auf den Gebieten der Forschung, der Technik und der Wirtschaft zu einer Zeitschrift entwickelt, deren führende Stellung ohne Einschränkung überall in Fachkreisen anerkannt wird. Der Kälte- und Klimatechniker findet in dieser Zeitschrift, was für ihn von Bedeutung ist.

Am Ausbau des Textteils arbeiten ständig der Herausgeber, die Schriftleitung und ein großer Stab von bekannten Mitarbeitern aus Kreisen der Industrie, der Wirtschaft und der Wissenschaft. Dadurch ist es möglich, in Kältetechnik-Klimatisierung interessante Fachbeiträge, Kurzmeldungen aus der Industrie, Patentmeldungen und aktuelle Tagungsberichte zu veröffentlichen, welche dem Leser jeden Monat eine umfassende Übersicht über das gesamte Gebiet Kälte- und Klimatechnik vermitteln. In jeder Ausgabe erscheint—auf Karton gedruckt—ein Arbeitsdiagramm.

Bitte fordern Sie ein Probeheft an!
